

"to f*ck around is human, to find out is divine." — building things since 9, still finding out.

i'm 19, based in mumbai, and i treat life like a polymath experiment. outside of work: training for ironman 70.3 and everest base camp, making electronic music, learning to sew. genuinely bullish on BCI. the most interesting people can't stay in one lane; i'm one of those people. i do it for the lore.
